

Redflex Traffic Systems currently trading as Verra Mobility company provides quality products efficiently, in a professional and flexible environment, on time and at the right cost to our customers in a manner that minimises our impact on the environment. Our vision is to be the world leader in the provision of intelligent telematics solutions and services.

We are committed to protecting the environment and conducting our business in an environmentally responsible and sustainable manner. We will comply with all relevant environmental legislation and other requirements, and where practicable, minimise any adverse environmental impacts that may result from our operations.

In implementing our policy, we aim to:

- Consider aspects of our operations that could cause environmental harm and the direct environmental impacts, including those of our offices, staff travel and the procurement of materials and services.
- Work with our clients and the supply chain to identify and mitigate the environmental impacts associated with the projects and services we deliver.
- Prevent pollution from delivery of our services and projects.
- Monitor, measure and communicate (both internally and externally) the environmental performance and consult with stakeholders to address concerns and drive new solutions, as required, of our activities in order to drive continual improvement in areas of significant risk and opportunity.
- Provide a culture of environmental awareness for our staff through training and communication.

As part of our commitment, we have set objectives and targets, which will be reviewed annually as an integral part of our business planning and strategy development.

We believe that through the implementation of this policy and our management systems we can meet our commitments, and in addition look beyond simple compliance towards best practice.

---

Senior Vice President, Managing Director International
